

## NIST Certification for RTLS Temperature Tags

Many hospital organizations using automated temperature monitoring for refrigerators, freezers and warmers have established policies that incorporate validation of the accuracy of temperature probes for regulatory compliance. Furthermore, many of these policies reference the National Institute of Standards and Technology (NIST), which has established a certification process to ensure that equipment is tested and found to be within the stated tolerance.

*Awarepoint offers an optional on-site certification service for T2T and T3E RTLS temperature-monitoring probes, in accordance with general requirements for the competence of testing and calibration laboratories by The American Association of Laboratory Accreditation (A2LA).*

### KEY ADVANTAGES OF THE AWAREPOINT RE-CERTIFICATION SERVICE

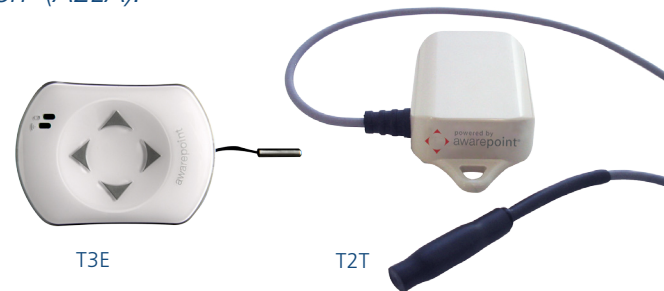

- Proactive management of the NIST Certification, improving hospital compliance
- Fast, comprehensive service, covering an average of 30-40 probes per day
- Certificates provided within 5 business days of service delivery
- Awarepoint probes that fail the NIST certification and are within warranty parameters are replaced at no cost

### TERMS AND CONDITIONS

- There is a \$50 charge for certification of each T2T and T3E temperature-monitoring device
- A Purchase Order is required to schedule the NIST Certification service; Hospitals will receive an invoice detailing item-level service
- Payment terms are net 30 days

### ACCREDITED SERVICES

- International Organization for Standardization (ISO) / International Electrotechnical Commission (IEC) 17025:1999 accredited
- American National Standards Institute (ANSI) / National Conference of Standards Laboratory (NCSL) Z540-1 compliant and NIST traceable

**NIST**

The National Institute of Standards and Technology (NIST) develops standards to establish conformity and enhance the quality of products. It is a non-regulatory federal agency under the Department of Commerce, and serves as the National Measurement Institute for the United States. The NIST's mission is to support and develop measurement standards and technology in order to improve efficiency, facilitate trade, and enhance the quality of life.

**Call your Awarepoint Representative to schedule a NIST Certification.**
